## **REDUNDANT PRIVATE FIBER SOLUTION FOR CONCEPTS ICT**

*EUNETWORKS PROVIDES DARK FIBER CONNECTIVITY FOR DUTCH INTERNET SERVICES PROVIDER*

**Amsterdam/Netherlands, 09 September 2008** – euNetworks, (SGX: H23.SI), Europe's foremost provider of mission-critical, extreme performance and capacity data services to large corporates, carriers and services providers, today announced it has completed an agreement with Dutch Internet Services Provider Concepts ICT. Under the terms of the agreement, euNetworks will deploy fiber | nex, a dedicated private fiber solution in Amsterdam, supporting the rollout of fiber-to-the-home and further Internet and hosting services in the Dutch capital.

Concepts ICT focuses on providing internet solutions to high-end consumers as well as small and medium sized enterprises and is one of the foremost providers of fiber-to-the-home services in the Netherlands. Concepts ICT required the highest levels of flexibility and reliability in their solution to support their fiber network solutions in Amsterdam. euNetworks designed and deployed fiber | nex, fully redundant dark fiber to point connections, which form a ring architecture between Concept ICT's main datacenter locations. Due to the end2end ownership of their networks, euNetworks deliver the highest levels of redundancy and single point of contact Service Level Agreements (SLA) in the industry.

Paul Wijngaard, General Manager of Concepts ICT, said: "Fiber-to-the-Home is highly superior compared to traditional DSL, let alone Dial in. It is the next generation network. Therefore, Concepts ICT participates in several large Fiber-to-the-Home projects in The Netherlands, for instance in Amsterdam, Enschede and Deventer. A good example is our cooperation with Reggefiber in Deventer, where we experienced enormous growth. 45% of all consumers have chosen a Concepts ICT Fiber-to-the-Home based subscription for Internet, telephony and TV during the roll-out phase of the network. This emphasizes the enormous potential of this access network technology."

"The reliance on telecommunications continues to accelerate, driving demand for mission critical, high capacity communications solutions delivered on fiber optic platforms - the panacea to slow, limited capacity copper based networks. Frost & Sullivan predicts that fiber-to-the-home networks will reach more than 14 million European households by 2012 and one telecommunications provider after the other spends millions to upgrade their existing infrastructure," said Barry Nolan, COO of euNetworks. "We were in the unique position to provide Concepts ICT with the required private fiber solution in Amsterdam due to our extensive fiber optic infrastructure in the Netherlands and in Amsterdam in particular."

### **fiber | nex Solutions**

fiber | nex is euNetworks' unique solution enabling customers with their own private fiber network with virtually limitless capacity. euNetworks provides clients with the ability to rollout high-capacity broadband services and bandwidth-intensive applications efficiently and securely with built-in network redundancy. euNetworks' metropolitan fiber infrastructure contains an average of six ducts per city with 432 strands of fiber in each duct. The network is designed redundantly in a dense, mesh configuration to provide 100 percent fail-over, mission-critical reliability.

### **About euNetworks**

euNetworks is Europe's foremost provider of mission-critical, extreme performance and capacity data services. We serve large Corporates, Carriers and Service Providers door2door. All our services are delivered over our wholly owned, billion euro pan-European all-fiber optic network. Our infrastructure uniquely combines 'long-haul' inter-city network linking Europe's largest economies, with high density 'last-mile'

metropolitan fiber networks in 15 of Europe's leading cities. euNetworks' product set ranges from On-Demand Networking and Solutions to Bespoke Networking. We have pre-provisioned over a terabit of capacity throughout our network, meaning we can deliver solutions such as datacenter, internet exchange or stock exchange connectivity in hours, not months. euNetworks, a member of the Global Voice Group, is headquartered in Frankfurt, publicly listed on the Singapore stock exchange (SGX: H23.SI). euNetworks is a member of euro-one, a unique collaboration to deliver infrastructure and next generation networking solutions connecting Eastern, Central, Western Europe and North America ([www.euro-one.com](http://www.euro-one.com)). ### **About Concepts ICT**

Concepts ICT was founded in 1996 as an independent internet service provider for consumers.

Between 2000 and 2004, Concepts ICT integrated Ision, Raketnet, Horizon Internet Services, FlevoNet and Cistron Internet Services into its organization

In March 2004, Concepts ICT was acquired by the Easynet Group. In January 2006, Easynet was acquired by BskyB.

Concepts ICT focuses on 'high-end consumers' and the Dutch SME market. Services offered by Concepts ICT are, among others, xDSL, fiber-to-the-home, hosting services in datacenters in Breda and Schiphol-Rijk, dial-in and VPN-solutions.

Concepts ICT is an innovator in the Fiber-to-the-Home market with triple play service offerings on various fiber networks in The Netherlands since 2004. Among these networks are the cities of Amsterdam, Rotterdam, Deventer and Enschede.
