EUNETWORKS DEVELOPS FIBER|NEX SOLUTION FOR WAYSS & FREYTAG INGENIEURBAU AG

RELIABLE DATACENTER CONNECTION FOR GERMAN ENGINEERING COMPANY

Frankfurt/ Germany, 16 September 2008 – euNetworks, (SGX: H23.SI), Europe's foremost provider of mission-critical, extreme performance and capacity data services to large corporates, carriers and services providers, today announced that it has concluded an agreement with construction engineering company Wayss & Freytag Ingenieurbau AG (Wayss & Freytag Ingenieurbau). Under the terms of the agreement, euNetworks will deploy a highly reliable private fiber solution to connect Wayss & Freytag's datacenter locations in Frankfurt.

Wayss & Freytag Ingenieurbau, a member of the Royal BAM Group, is one of the leading companies for civil engineering in Germany. Considering their ever-increasing bandwidth and security requirements, Wayss & Freytag Ingenieurbau needed a highly available and scalable networking solution, connecting their main datacenter site with second facility to form a twin datacenter solution for highly reliable disaster recovery. Taking these criteria into account, euNetworks deployed fiber|nex, redundantly connected private fiber networks in Frankfurt. fiber|nex enables Wayss & Freytag Ingenieurbau with an extremely secure platform for data transport and recovery, meeting their most exacting requirements with regards to scalability and availability.

Harald Weiß, Head of IT, Wayss & Freytag Ingenieurbau AG, commented: "Wayss & Freytag Ingenieurbau needed a highly reliable solution to connect our datacenter site in Frankfurt, and euNetworks as owner and operator of one of the most advanced fiber networks in Europe was uniquely positioned to deliver upon this requirement. We are extremely satisfied with the carrier class, highly scalable solution that the euNetworks team provided."

Barry Nolan, Chief Operating Officer of euNetworks, said: "Disaster Recovery is playing a major role for businesses nowadays. Our network infrastructure in Frankfurt traverses the main business and financial districts and connects to a range of datacenters within the city or beyond its borders via our pan-European infrastructure. euNetworks was therefore in the unique position to cost efficiently enable Wayss & Freytag Ingenieurbau with the required networking solution."

fiber | nex services

fiber | nex is euNetworks' unique solution enabling customers with their own private fiber network with virtually limitless capacity. euNetworks provides clients with the ability to rollout high-capacity broadband services and bandwidth-intensive applications efficiently and securely with built-in network redundancy. euNetworks' metropolitan fiber infrastructure contains an average of six ducts per city with 432 strands of fiber in each duct. The network is designed redundantly in a dense, mesh configuration to provide 100 percent fail-over, mission-critical reliability.

About euNetworks

euNetworks is Europe's foremost provider of mission-critical, extreme performance and capacity data services. We serve large Corporates, Carriers and Service Providers door2door. All our services are delivered over our wholly owned, billioneuro pan-European all-fiber optic network. Our infrastructure uniquely combines 'long-haul' inter-city network linking Europe's largest economies, with high density 'last-mile' metropolitan fiber networks in 15 of Europe's leading cities. euNetworks' product set ranges from On-Demand Networking and Solutions to Bespoke Networking. We have pre-provisioned over a terabit of capacity throughout our network, meaning we can deliver solutions

such as datacenter, internet exchange or stock exchange connectivity in hours, not months. euNetworks, a member of the Global Voice Group, is headquartered in Frankfurt, publicly listed on the Singapore stock exchange (SGX: H23.SI). euNetworks is a member of euro-one, a unique collaboration to deliver infrastructure and next generation networking solutions connecting Eastern, Central, Western Europe and North America (www.euro-one.com). About Wayss & Freytag Ingenieurbau AG

Wayss & Freytag Ingenieurbau AG is a specialist for engineering technology in conception, planning and realisation of international challenging projects. Competence, special know-how and customer orientation are characteristic for our work.

Wayss & Freytag Ingenieurbau AG has got more than 130 years of experience. The company evolved in the year 2000 from Wayss & Freytag AG, which played a major role in the development of reinforced steel construction. Wayss & Freytag has given fundamental impulses to the development of construction technology with countless innovations and patents. Various patents of the company, e.g. various tunnel ring segment constructions as well as mixshield technology and hydroshield technology are applied worldwide.

We think and act as Europeans – and realize projects throughout the world. We are a group company of the Royal BAM Group, market leader in the Netherlands and No. Five in the European construction market with a turnover of € 8.6 billion. More than 30,000 employees cooperate in international special teams, to dedicate their particular know-how to the success of our clients.

Scope of Activities

- Mechanical Tunneling
- Shotcrete Tunneling (NOT)
- Railway Construction
- Caissons
- Industrial Construction
- Bridge Construction
- Road Construction
- Stadium und multifunctional Arenas

- Environmental Technology
- Hydraulic Engineering
- Hydrostations
