EUNETWORKS DELIVERS HOST | NEX FOR XS4ALL

HIGH AVAILABILITY SOLUTION TO SUPPORT DUTCH INTERNET SERVICE PROVIDER

Amsterdam / The Netherlands, 12 March 2008 – euNetworks (SGX: H23.SI), owner and operator of one of Europe's highest capacity fiber networks and provider of mission critical communication infrastructure and services, today announced that it has signed an agreement with Dutch Internet Service Provider XS4ALL. Under the terms of the agreement, euNetworks will deploy host | nex – a high availability solution comprising private co-location space at euNetworks' premium datacenter facility in Amsterdam.

XS4ALL, one of the Netherlands' leading providers of secure, high-speed internet solutions, required a reliable platform to meet the stringent demands of their customers in the private and business markets. euNetworks designed and deployed a highly secure private co-location suite at euNetworks' high-power density datacenter in Amsterdam. The premium facility in Amstel Business Park has been designed to the highest standards of security, cooling and power density. XS4ALL's private co-location area includes redundant feeds for each cabinet and meets the most rigorous requirements in terms of security and availability.

Anouk Noordervliet, Head of marketing and product management of XS4ALL, said: "XS4ALL was looking for a platform in a state-of-the-art datacenter facility to support the bandwidth and security requirements of our burgeoning customer base. euNetworks' solution of private co-location at their highly secure and carrier neutral datacenter in Amsterdam more than meets our demands."

Noel Meaney, Chief Executive Officer of euNetworks said: "Delivering on ever-increasing bandwidth demands, XS4ALL required highest levels of reliability and security in their solution. euNetworks' ownership of a premium datacenter facility in Amsterdam uniquely enables our customers with high-power density, secure infrastructure on which to rollout mission critical solutions."

host | nex services

host | nex is euNetworks' high availability hosted services solution, providing enterprise, carrier and service provider clients with best in class co-location and managed services. host | nex offers a range of Storage and Business Continuity services, Hosting services, such as Remote Hands and Power, as well as variety of Security Services and Firewalls. euNetworks operates more than 15,000 square metres of co-location space in Europe, designed to the highest standards of security, cooling and power density to meet the demands of the most exacting requirements. The facility is purpose built to the highest specifications and connected to euNetworks' metro and long haul all-fiber network.

About euNetworks

euNetworks owns and operates one of Europe's highest capacity fiber network and provides mission critical communication infrastructure and services to large corporates, carriers, and service providers. Constructed at a cost in excess of €1.3 billion, euNetworks all-fiber optic network uniquely combines 'long-haul' inter-city network linking Europe's largest economies, with high density 'last-mile' metropolitan fiber networks in 15 of Europe's leading cities. euNetworks was recently awarded the prestigious title of "Best New Entrant" by leading telecommunications publication, Capacity Magazine. The award was granted to euNetworks following their acquisition of a pan-European fiber network thus extending their unique proposition of delivering private fiber networks – an offering the judges felt is of immense value to large Corporates and carriers alike. euNetworks, a member of the Global Voice Group, is headquartered in Frankfurt, publicly listed on the Singapore stock exchange (SGX: H23.SI). euNetworks is a member of euro-one – a unique collaboration of fiber optic network providers to deliver infrastructure and next generation networking solutions, connecting Eastern, Central,

Western Europe and North America (www.euro-one.com). For further information please visit www.euNetworks.com.
