euNetworks Adds Basildon to its Dedicated Finance Network

- New ultra low latency route connecting Basildon to Frankfurt
- Continued investment maintains euNetworks' position as the bandwidth partner of choice

London, UNITED KINGDOM – 17 December 2012 – euNetworks Group Limited (SGX: H23.SI), a pan-European bandwidth infrastructure provider, announced it has launched a new ultra low latency route, adding Basildon (NYSE Euronext) in the United Kingdom to its dedicated finance network. Delivering one of the shortest routes in the market today, euNetworks provides direct exchange-to-exchange connectivity linking Basildon to Frankfurt with a one way latency of less than 4.15 milliseconds.

euNetworks offers market leading latency performance from all major capital markets across Europe, enabling customers with direct and high bandwidth connectivity via the [euTrade](#) service portfolio.

"Basildon is a critical trading location with growing importance to the financial community," said David Selby, Vice President of Product and Strategy at euNetworks. "This new addition to our network was a natural next step in the development of our euTrade service portfolio and we are excited to be able to launch this leading route to our existing and new customers. Our clients continue to have access to a European wide ultra low latency networking solution and importantly, one that we continue to develop and optimise to support their growing and changing bandwidth needs. Today we deliver leading low latency solutions across our London metropolitan network, through to Slough and Basildon, Frankfurt, Stockholm, Zurich and Milan, directly into financial exchanges."

About euNetworks

euNetworks Group Limited (SGX: H23:SI) is a bandwidth infrastructure provider, owning and operating 13 fibre based metropolitan networks across Europe connected with a high capacity intercity backbone covering 38 cities in 9 countries. The Company offers a portfolio of metropolitan and long haul services including Colocation, Dark Fibre, Metro Wavelengths, Wavelengths, Ethernet, and Internet. Enterprise and carrier customers benefit from euNetworks' unique inventory of fibre and duct based assets that are tailored to fulfil their high bandwidth needs.
