euNetworks Delivers Infrastructure to Norisco in Support of Customer 7digital

- euNetworks' Dark Fibre bundled with Norisco's IT solutions for service in London

London, UNITED KINGDOM – 21 May 2013 –euNetworks Group Limited (SGX: H23.SI), today announced a new multi-year agreement and partnership with IT solutions provider Norisco. euNetworks was selected to deliver a high speed low latency network in London, providing a scalable and flexible bandwidth connection from a data centre to a new office location for Norisco's customer. This fibre connection was bundled with additional IT services from Norisco, as a full IT solution for 7digital, one of the world's leading open music platforms.

Norisco specialise in the delivery of IT solutions covering telecommunications, unified communications, networking, data centre and security, with a focus on dependable and innovative solutions for their customers. Norisco has developed strong and well-established relationships with vendors and support partners, enabling customers to benefit from reliable access to solutions from leading vendors through just one dedicated point of contact.

"At Norisco we focus on ensuring we have an intimate understanding of our customer's business so we can deliver them the best IT solution possible, with strong partners to support us," said Eamon Campbell, Managing Director of Norisco. "euNetworks share the same approach to customer support and have rapidly delivered a fibre infrastructure that effectively offers unlimited bandwidth to our customers."

"We are delighted to be working with Norisco," said Uwe Nickl, Chief Marketing Officer of euNetworks. "They have developed an approach to IT strategy that enables their customers to truly exploit their IT infrastructure investment as effectively as possible, enabling customers to focus on their core business. For a leading online media business such as 7digital that's hugely important. Connecting 7digital's office to its key data centre on our facilities based infrastructure in London delivers 7digital with the bandwidth scalability required as demand for their digital music service and open platform only increases."

"Our business is centred on the provision of open access to the broadest catalogue of fully licensed, high quality digital music for consumers, developers and a wide range of partners around the world," said Paul Richards, Head of IT Infrastructure at 7digital. "Our IT platforms and connectivity solutions need to work and scale. The fibre connection provided by euNetworks gives us the flexibility and control we need, enabling enhanced online delivery by serving the growing bandwidth needs between our data centre and new office."

About euNetworks

euNetworks Group Limited (SGX: H23:SI) is a bandwidth infrastructure provider, owning and operating 13 fibre based metropolitan networks across Europe connected with a high
