euNetworks Delivers Bandwidth Infrastructure to Telehouse Deutschland GmbH

- Strategic partnership supporting Telehouse's network infrastructure demands from end customers

London, UNITED KINGDOM; Frankfurt am Main, GERMANY – 31 January 2013 – euNetworks GmbH, a subsidiary of euNetworks Group Limited (SGX: H23.SI), today announced it has signed a strategic partnership with Telehouse Deutschland GmbH covering the exclusive provision of fibre connectivity by euNetworks to support Telehouse's growing bandwidth needs. Under the terms of this new agreement, euNetworks has delivered Dark Fibre services to Telehouse.

Telehouse's Frankfurt facility is located 3 kilometres from central Frankfurt, and as one of the largest data-housing facilities in Germany, is the colocation facility of choice in the city. Telehouse Frankfurt is connected to Europe's second largest Internet exchange, the DE-CIX, with over 400 international and domestic Internet Service Providers (ISPs) and carriers present in the facility. It has also become an ideal colocation facility for fast-growing multinational corporations and SMEs who also have a growing demand for value added services from Telehouse. It is these services that Telehouse are looking to support with the scalable bandwidth that euNetworks' Dark Fibre services deliver.

In the city of Frankfurt, euNetworks owns and operates a densely fibred, mesh-based city network that today delivers scalable bandwidth services to enterprise and wholesale customers. With this infrastructure, euNetworks can support multiple applications, from data centre connectivity to enterprise office connectivity, to trading across its footprint.

"We are delighted that Telehouse Deutschland has selected euNetworks to deliver their underlying fibre and connectivity needs in support of their customers," said Uwe Nickl, Chief Marketing Officer of euNetworks. "We look forward to a long and growing relationship with Telehouse, and are excited for the opportunity ahead with this partnership in place."

"A reliable infrastructure provider is vital to Telehouse Deutschland as we strive to serve the needs of our customers," said, Dr. Béla Waldhause, Chief Executive Officer of Telehouse Deutschland GmbH. "euNetworks' expertise, flexibility, performance and the reliability of their network makes them a strong connectivity partner as we continue to grow our business."

About euNetworks

euNetworks Group Limited (SGX: H23:SI) is a bandwidth infrastructure provider, owning and operating 13 fibre based metropolitan networks across Europe connected with a high capacity intercity backbone covering 38 cities in 9 countries. The Company offers a portfolio of metropolitan and long haul services including Colocation, Dark Fibre, Metro Wavelengths, Wavelengths, Ethernet, and Internet. Enterprise and carrier customers benefit from euNetworks' unique inventory of fibre and duct based assets that are tailored to fulfil their high bandwidth needs.
