PRESS RELEASE

EUNETWORKS DEPLOYS PAN-EUROPEAN ETHERNET CONNECTIVITY FOR iBROWSE
MISSION CRITICAL ETHERNET SOLUTION FOR INTERNET SERVICE PROVIDER

Frankfurt, Germany – 19 November 2008 – euNetworks (SGX: H23.SI), Europe’s foremost provider of mission-critical, high performance data services, today announced that it has concluded an agreement with business-to-business Internet Service Provider (ISP) iBrowse. euNetworks will deploy ether|nex, an Ethernet based networking solution to connect two of iBrowse’s datacenter locations in London and Frankfurt.

iBrowse provides managed international private networks to multiple sites around the world to a range of companies, with a large installed base in the hotel industry. iBrowse required a highly reliable and scalable solution to connect their datacenter in London with a datacenter location in Frankfurt to offer a set of services to their expanding customer base. euNetworks enabled iBrowse with ether|nex, euNetworks’ high availability Ethernet solution for the real-time sharing of applications and speedy transfer of data between iBrowse’s sites in London and Frankfurt. ether|nex is deployed over euNetworks’ all-fiber optic network, providing iBrowse with a highly secure and scalable platform to ensure mission-critical communications.

Jonathan Angel, Managing Director of iBrowse, commented: “iBrowse chose euNetworks for its DWDM optical platform that provided iBrowse absolute control over end-to-end service quality and its ability to deliver international circuits rapidly and smoothly.”

Noel Meaney, Chief Executive Officer, euNetworks, said: “We are delighted that iBrowse has chosen euNetworks for the deployment of their Ethernet solution. euNetworks, leveraging off our pan-European next generation network, was uniquely positioned to cost efficiently deliver the mission-critical, highly scalable solution.”

ether|nex services

Pre-provisioned throughout euNetworks’ network, ether|nex enables customers to connect on-demand to office and/or datacenter locations, and scale from FE, to GE and 10GE. Unlike other operators, euNetworks’ Ethernet service is carrier-grade and provisioned directly on the optical layer – in other words, fully transparent Layer 2 Ethernet (no IP/Layer 3 equipment) ensuring the most robust, reliable, secure and low-latency Ethernet service across Europe.

About euNetworks

euNetworks is Europe's foremost provider of mission-critical, extreme performance and capacity data services. We serve large Corporates, Carriers and Service Providers door2door. All our services are delivered over our wholly owned, billion euro pan-European all-fiber optic network. Our infrastructure uniquely combines 'long-haul' inter-city network linking Europe's largest economies, with high density 'last-mile' metropolitan fiber networks in 15 of Europe's leading cities. euNetworks' product set ranges from On-Demand Networking and Solutions to Bespoke Networking. We have pre-provisioned over a terabit of capacity throughout our network, meaning we can deliver solutions such as datacenter, internet exchange or stock exchange connectivity in hours, not months. euNetworks, a member of the Global Voice Group, is headquartered in Frankfurt, publicly listed on the Singapore stock exchange (SGX: H23.SI). euNetworks is a member of euro-one, a unique collaboration to deliver infrastructure and next generation networking solutions connecting Eastern, Central, Western Europe and North America (www.euro-one.com).
